

## **OWHA MANDATORY REQUIREMENTS OWHA CONCUSSION CODE OF CONDUCT**

### **CONCUSSIONS in SPORT**

A concussion is a common form of head or brain injury that causes changes in how the brain functions, leading to symptoms that can be physical, cognitive or emotional/behavioural. A concussion can occur from a direct or indirect blow to the head or body that causes the brain to move rapidly back and forth within the skull.

Though concussions are common sport injuries, particularly among children and youth, there are sometimes subtle symptoms that may go unnoticed. Without identification and proper management, a concussion has the potential to result in permanent or severe brain damage.

Ontario takes the health and well-being of athletes seriously. Ontarians want to know that amateur athletes are protected by a safe sport system where everyone understands concussions, actively minimizes the risk of concussions, and knows what to do immediately if someone is concussed.

The government is improving concussion safety to create a world class amateur sport system where athletes can participate safely.

The OWHA supports the government in improving concussion safety to create a world class amateur sport system where athletes can participate safely.
